

Pong Game v1.0

A simple Pong game implemented in JavaScript using HTML5 Canvas.

Overview

This is a browser-based implementation of the classic Pong game. It features two-player paddle controls, a bouncing ball, score tracking, and game pause functionality. The game dynamically adjusts to the canvas size.

Features

- Smooth paddle movement with continuous key press support
- Ball collision with paddles and walls
- Scoring system and automatic pause after each point
- Fully responsive canvas for width/height changes
- Self documented code structure using a Model-View-Controller pattern
- JSDoc comments for documentation

Controls

Player	Keys
Left Paddle	W (up), S (down)
Right Paddle	P (up), L (down)
Start / New Game	N or R (Not specified)

Installation

1. Clone or download the repository:

```
git clone https://github.com/Wobbleyaj1/Pong.git
```
